

PRESS RELEASE

FOR IMMEDIATE RELEASE

Johannesburg – 25 October 2023

Gold One's Modder East Operations is pleased to announce that all employees who were held hostage have now been safely released. While this ordeal has been a traumatic experience, we are relieved to confirm that all employees are now out of harm's way.

Regrettably, there were a few injuries sustained during the incident. However, we can confirm that all employees, including those who were injured, are currently receiving medical attention from our healthcare professionals.

We would like to extend our gratitude to all those involved in ensuring the safe release of the hostages.

We will be working closely with the relevant authorities to conduct a thorough investigation into the events leading up to this incident. We are committed to addressing any underlying issues to prevent such incidents from occurring in the future and on doing everything possible to secure labour peace at the mine. Our focus over the past few days has been solely on securing the safe release of all our employees. We will now turn our attention to taking necessary action against those involved in the conduct of any unlawful and illegal activity.
